

REVENUE CYCLE MANAGEMENT

Applications to improve your financial performance

OUR PROMISE

The healthcare industry is struggling to cope with complex reimbursement models, compliance pressures and declining collections. BillingParadise provides you financial and performance management tools that will transform your claims data into actionable intelligence. Make fact-based financial decisions, monitor key revenue cycle KPIs and realize positive financial outcomes with our suite of power-packed RCM tools.

ARAnalyzer- CLEAR AR BACKLOGS AND OPTIMIZE RECEIVABLES

The screenshot displays the ARAnalyzer software interface. At the top, it shows the 'Total Billed Amount Summary: \$13,466.44'. Below this, there are navigation buttons like 'All Records', 'SAVE', 'Add Comments', and 'Refresh'. A table lists various claims with columns for Sno, Client Name, Provider Name, Denial Date, Claim No, Patient Name, DOS, Procedure Code, PolicyID, and DOB. The table contains 10 rows of data. At the bottom, there are filters for 'From' (2/13/2014) and 'To' (6/22/2016), along with a 'New' button and a search icon.

Do you let claims slip through the cracks and disappear? Eliminate AR cycle inefficiencies, follow-up better and increase collections in simple clicks. Bring your team and data together on a single, innovative and robust platform. ARAnalyzer offers across the board receivables management solutions.

Quick snapshot of its features:

- Follows an automated receivables management workflow to systematically decrease days in AR
- Prioritizes and organizes pending AR into buckets based on age, value of claim and insurer
- Provides AR reports that allow multi-level drill down
- Automatically tracks and updates the financial outcome of account receivables followed up on
- Improves consistency, accuracy and transparency in the AR management process through actionable insights

DenialManager - YOUR GATEWAY TO REDUCE DENIALS

At BillingParadise we understand that being a successful healthcare organization hinges on minimizing denials and improving cash recovery strategies. Identify, track and prevent claim denials in one powerful, secure and feature-rich application. DenialPreventer unites denial information from your existing systems into a single, customizable database.

Key features at a glance:

- Using user-defined business rules DenialManager automatically routes denials to the right person enabling quicker resolution
- Maps denial reason codes to identify denial trends and address problem areas
- Creates an audit trail so the productivity of the denial management team can be easily monitored
- Categorizes denials into different follow-up groupings
- Offers extensive reports and classifies denials by denial type/payer/value of claim/remark code etc.,
- Automates the appeals creation and submission process

ContractEdge – FOR BETTER PERFORMING CONTRACTS

Do you have a hard time managing contracts? Are you being consistently underpaid? Discover overlooked revenue opportunities and gain a 360 degree visibility of contract analytics with ContractEdge. This is data that conveys a lot more than just numbers...

Get the contract negotiation edge

- Identifies payment errors and helps medical practices recover lost reimbursement with data driven insights
- Scrutinizes insurer compliance with contractual terms and audit remittances
- Mitigates compliance risks, evaluates contract performance and helps in creating more profitable fee schedules
- Runs comparison reports across various fee schedules
- Provides updated Medicare fee schedules to enable better contract management

CodePro – OVERCOME MEDICAL CODING CHALLENGES

The volume and structure of ICD-10 has transformed the way healthcare organizations code. It is essential that medical coders are equipped with efficient tools and platforms to increase productivity and reduce fluctuations to the coding cycle. CodePro, with its comprehensive features and reports, can be a potent weapon in your revenue cycle arsenal.

5 smart features of CodePro

- Lists out top paying CPT codes so users know where to focus on to drive up revenue
- Automatically assigns work lists to coders based on specialty and EHR specific expertise
- Reduces DNFB and increases coding accuracy
- Scrubs codes and runs NCCI, MUE, procedure code and outpatient code edits
- Runs comparison reports on the reimbursement provided by insurers for each medical code.

ClaimCheck – BECAUSE EVERY CLAIM MATTERS...

A recent study reveals that a shocking \$83,000 are spent, per physician annually by healthcare organizations on interactions and follow-ups with insurers. Most interactions can be tied back to one factor-claim errors. Our efficient and feature-packed claims analysis tool comes with extensive, built-in edits. Submit cleaner claims and accelerate your claims cycle. Today.

A quick snapshot of ClaimCheck

- Gain visibility across your entire claims cycle, right from claims creation to claims submission in a few taps.
- Monitor the journey of individual claims in real-time
- View payer specific claims data
- Beautifully designed and easily navigable interface
- Inbuilt claims scrubbing tools to increase your first pass claim acceptance rate

theBillingBridge – DATA THAT SPEAKS TO YOU
